CUSTOM SOFTWARE DEVELOPMENT

Custom software development is the process of designing, creating, deploying and maintaining software for a specific set of users, functions or organizations. Custom software development is performed by our in-house development teams. A custom project would move through the familiar steps of requirements gathering, code construction, testing and deployment and apply the same methodologies, like Agile, DevOps or Rapid Application Development, as any other software project.

We offer all types of software developments using wide range of technologies and methodologies as per your requirement to give you the desired output exceeding your expectations.

- Microsoft Stack - .NET, .NET Core, ; C#, ASP, MVC, O365 API, Microsoft SharePoint, Microsoft Dynamics, SQL Server
- Web Technologies: Java, JS Frameworks like Angular JS, Vue JS, React JS
- Cloud Technologies: MS Azure and related technologies like Azure AD, Microsoft Cognitive Service, DevOps, Azure Table Space, Cosmos DB etc.; AWS stack of technologies, Google Cloud Platform
- AI Technologies: Tensorflow, Microsoft Cognitive Service, Chatbots
- Storage Technologies: NOSQL DBs like Cosmos DB, Mongo DB; Relational Databases like MS SQL Server, Oracle, MySQL, PostgreSQL
- SaaS

NU ETA TECHNOLOGIES

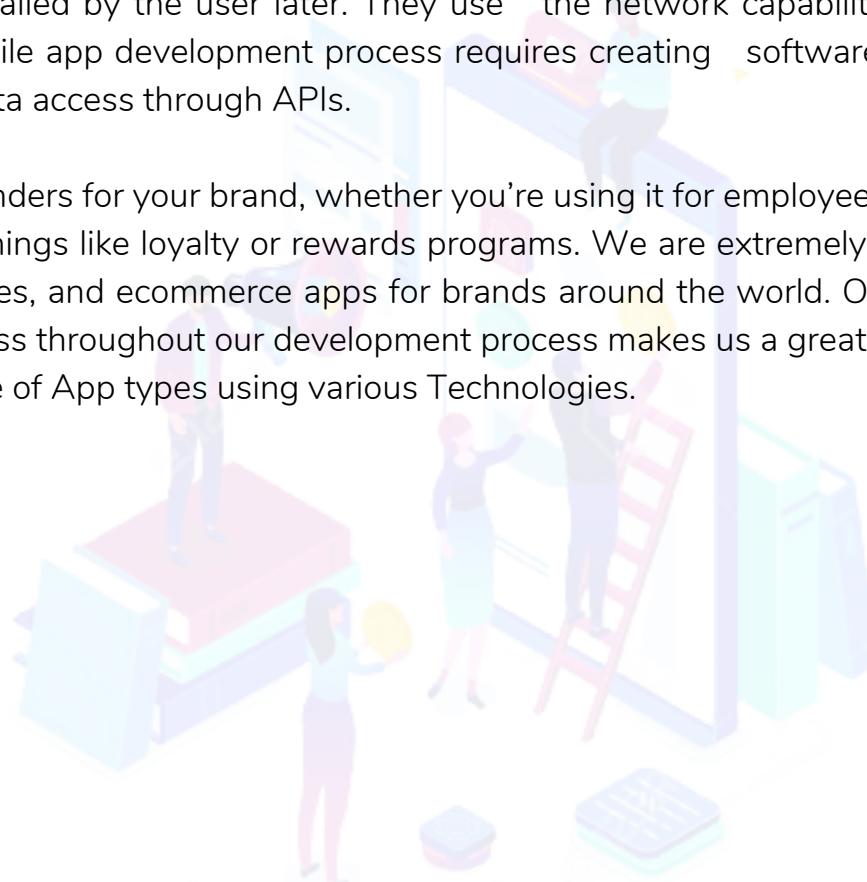

Everything Tech!

MOBILE APP DEVELOPMENT

Mobile app development is a process for building mobile applications that run on mobile devices. These applications can either be pre-installed or downloaded and installed by the user later. They use the network capabilities of the device to work computing resources remotely. Hence, the mobile app development process requires creating software that can be installed on the device, and enabling backend services for data access through APIs.

A custom Android/iOS app can do wonders for your brand, whether you're using it for employee productivity, as a social engagement mechanism, or as a way to facilitate things like loyalty or rewards programs. We are extremely experienced in building a wide array of social apps, productivity apps, games, and ecommerce apps for brands around the world. Our focus on effective design, cutting-edge technology, and cost-effectiveness throughout our development process makes us a great choice for brands looking to leverage mobile technology. We offer wide range of App types using various Technologies.

- Native App
- Cross Platform App
- Hybrid App
- Progressive Web App

DATABASE

A database is an organized collection of structured information, or data, typically stored electronically in a computer system. A database is usually controlled by a database management system (DBMS). Together, the data and the DBMS, along with the applications that are associated with them, are referred to as a database system, often shortened to just database.

There are many different types of databases. The best database for a specific organization depends on how the organization intends to use the data. We offer a wide range of services for creating, storing and managing Data.

- Oracle Database
- Microsoft SQL Server
- MySQL
- dBASE

DATA SERVICES

Data is essentially the plain facts and statistics collected during the operations of a business. They can be used to measure/record a wide range of business activities - both internal and external. Businesses can harness data to make decisions about: Finding new customers, Increasing customer retention, Improving customer service, Better managing marketing efforts, Tracking social media interaction, Predicting sales trends etc.

We help businesses to turn raw numbers into strategic business insights. We offer Data Science as a service and perform difficult analytics for all businesses and service providers. We offer wide range of service to transform data as per your requirement.

- Data Science
- Artificial Intelligence & Machine Learning Service
- Data Analytics
- Data Warehouse
- Data Visualization

TESTING & QA

Quality assurance (QA) testing is the process of ensuring that your product is of the highest possible quality for your customers. QA is simply the techniques used to prevent issues with your software product or service and to ensure great user experience for your customers.

Our quality assurance (QA) testing methodology is a combination of both automated testing and manual testing. We offer end-to-end Software Testing services.

- Functional Testing
- Performance Testing
- Security Testing
- Test Automation

Everything Tech!

CLOUD

Cloud services are services available via a remote cloud computing server rather than an on-site server. These scale-able solutions are managed by a third party and provide users with access to computing services such as analytics or networking via the internet. Cloud services offer powerful benefits for the enterprise, from greater productivity and enhanced efficiency to significant cost reductions and simplified IT management.

We offer cloud computing services including servers, storage, databases, networking, software, analytics, and intelligence—over the Internet (“the cloud”) to offer faster innovation, flexible resources, and economies of scale.

- AWS
- Microsoft Azure
- Google Cloud
- Open Stack

DEVOPS

DevOps is a combination of the terms development and operations, meant to represent a collaborative or shared approach to the tasks performed by a company's application development and IT operations teams. In its broadest meaning, DevOps is a philosophy that promotes better communication and collaboration between these teams and others in an organization.

Our DevOps engineers incorporate DevOps processes in your organization and use modern tools that complement your frameworks. We automate your cloud infrastructure and processes while ensuring continuous delivery and continuous integration to quickly get your product to the market.

- Assessment & Strategy Planning
- DevOps for Accelerated Outcomes
- Framework & Tool Stack
- Managed DevOps Services

UI/UX DESIGN

Design is one of the most important factor when building a brand. The design is what will set you apart from your competition and help you garner the desired emotion or feeling from customers. It is what will make people believe that your company and your product actually work better than the competition.

We offer a wide range of design services for all your needs.

- Web Design
- Software Design
- Product Design
- Graphics Design
- Digital Marketing
